Career history

CartoDB *Tech lead*

September 2014 - Now

Development of [CartoDB](#), an open source SaaS geospatial platform, as part of the Product team, reporting directly to the Chief Technology Officer and Chief Product Officer.

Some of the work I have contributed to:

- Redesigned and rebuilt commercial site, as well as documentation, and blog sites managing a team in charge of them.
- Development tasks for user authentication service of CartoDB.
- Implemented metrics reporting system based on user events and properties of CartoDB users.
- Implemented front-end tooling workflows to the projects above.

Vizzuality *Front-end developer*

March 2013 - September 2014

Build visualizations and web applications based on [CartoDB](#).

Some of the work I have contributed to:

- [Global Forest Watch](#)
- [LivingCities: A shared cartographic experiment from HERE and CartoDB](#)
- [Twitter: The NBA Finals visualized](#)

Crisalix *UI lead developer*

February 2011 - March 2013

Design the interface and build the Front-end architecture for a SaaS medical product.

My responsibilities included manage the design team and coordinate with the rest of developers, reporting directly to the VP of engineering.

During this time we released several professional and consumer solutions:

- Rebuilt the professional solution into a cloud based platform.

- Released a consumer solution for patients.
- Redesigned the 3D simulator user interface and simulation process.
- Developed an application for mobile devices.

Education

Programa Vostok IV Vostok Studio

January 2013 - September 2013

Interaction design course about:

- Design elements and principles
- Design process and methodology
- Design for mobile devices

Industrial Engineering Universidad Politécnica de Valencia

September 2006 - September 2009 (Unfinished)
